

David Craddock BSc(Hons) MBCS

AI Security Engineer | DevSecOps & LLM Security | 20+ Years Software & Cloud

Email: davidpaulcraddock@pm.me

- * **Agile Software Development** – 20 years experience in software development, including product development.
- * **Programming languages** – 10+ years experience in Python, Bash, and Node.js, 5+ experience in Ruby, PHP
- * **Devops stacks** – 20+ years experience in Linux, CLI and Bash expert. 5+ very strong on Docker, Docker Compose.
- * **Cloud** – AWS and GCP experience, having used both in production deployments
- * **CI/CD** – Strong in Jenkins, Github Actions, GoCD
- * **Cyber Security** – Actively upskilling in this area from a solid base – I used to be a teenaged hacker and got published in 2600.
- * **AI/ML/GenAI** – Undergrad degree in AI, currently studying Machine Learning at Imperial College, strong experience hosting LLMs and using Agentic approaches to software development.

Recent Experience

Professional Development & Certifications

Oct 2024 -> Present

- * MSc Cyber Security, Royal Holloway, University of London - distance learning part-time student, currently on track for a distinction
- * PG Cert in AI/ML Imperial College London - distance learning part-time student
- * Studying towards OSCP+
- * Studying towards AWS certificates

Principal QA/DevOps Consulting Engineer

Jan 2024 -> Oct 2024

- * Worked for two major defence and government software consulting organisations (British Aerospace Intelligence Systems and CGI UK Ltd).
- * Worked on developing test strategies, mentoring, and upskilling in cloud and devops technologies, including studying for the AWS Architect Associate Certification.

Health Sabbatical

Feb 2023 -> Jan 2024

- * Beat cancer (full remission, cured) which was a huge personal achievement that necessitated grit and determination against the odds.

- * Worked on my extensive home lab
- * Worked on building out and open-sourcing my VWorkbench project, a extensive Linux development environment

Senior DevOps/Test Automation Engineer

Jan 2021 -> Jan 2023

Kaboodle Ltd

- * Working in the DevOps team, I used Docker, Docker Compose, GitHub Actions, Jenkins, Cypress.io, Postman, Newman and Node.js to implement test automation and software development DevOps, with an objective of allowing the team to deliver faster and more accurately.
- * I developed an extensive and advanced technical testing strategy for the entire organisation.

QA Engineer at ITV

October 2019 -> November 2020

ITV Plc

- * Working on exploratory testing and automated testing for the accounting system that pays the on-screen talent in ITV.
- * I used: Java, Python, MicroServices, Docker, RabbitMQ, Cucumber, MySQL and some JavaScript.

Senior DevOps/QA Engineer at Arm Ltd

June 2017 -> October 2019

Arm Ltd

- * A hands-on very technical software engineering role in this world leading tech company, combining DevOps and CI administration/management, as well as test automation and some elements of exploratory testing, for a High Performance Computing C++/Fortran compiler.
- * I used Make, Jenkins, Bash, Docker, C++, Python, GoCD and the Robot framework.

Senior Software Engineer/Manager at BBC

September 2010 -> June 2017

BBC

- * I took a Senior Engineer role in Hive CI, a continuous integration system to automate mobile and smart TV device testing. This involved development in Node.js and Ruby, on a virtualised Linux stack. Technologies used: Calabash, Appium, AWS, Android, iOS, Linux, Bash, Ruby.
- * I spent a year working as a Test Manager and leading a team of 3 contractors, being responsible for their output.
- * I worked as a Software Engineer on high volume Smart TV web applications using Java/Spring/Tomcat, using BDD with Ruby/Cucumber and TDD with JUnit and Mockito.
- * I worked as a Software Reliability Engineer on the broadcast end of the BBC's architecture, maintaining and supporting the uptime of systems which served up content that is delivered on live BBC TV. I patched these systems in Java, Perl and MHEG, and did a lot of work reconfiguring and supporting these deployments.

Education

- * **BSc (Honours) Computer Science and Artificial Intelligence** – Sussex University
- * **MSc Cyber Security** – Royal Holloway, University of London – Ongoing
- * **Professional Certificate in Artificial Intelligence and Machine Learning** – Imperial College London – Ongoing

Professional Accreditation / Security Clearances

- * **Lapsed UK Security Clearance at SC level Held** – should be trivial to re-activate it with a qualified holding organisation
- * **MBCS** – Member of BCS
